SUMMARY:

Frontend-focused Software Engineer with 4.5+ years of industry experience in developing web and mobile applications. Proven track record of building scalable and user-friendly interfaces using React and React Native, reaching thousands of users. Passionate about delivering digital solutions that solve real-world challenges and improve user experience.

EXPERIENCE

S P A Enterprise Services Ltd.

Senior Software Engineer | Nov 2025 - Present

Vectoscalar Technologies Private Limited

Senior Software Engineer | July 2022 - Oct 2025

Software Engineer | Jan 2021 - June 2022

PROJECTS:

Infosys - Self Verification | Nov 2025 – Present

- Developed a full-stack self-verification and contractor oversight platform enabling oil & gas workers to conduct protocol-based safety assessments, manage verification workflows, and generate compliance reports with multilingual support (React 19, TypeScript, C#, .Net, Azure MSAL, BP HXD Design System)

British Petroleum - Lens | July 2023 – Oct 2025

- Delivered full-stack development of an automated learning content creation platform using React, TS, C# .Net, mongo, eliminating manual documentation efforts and generating 1200+ training documents for BP's global workforce across web and mobile applications.

Pokerbaazi - Pokerboss | March - 2023 – June-2023

- A mobile application built using **React Native**, **Redux**, and **Firebase**, where users can play poker games and earn rewards.
- Contributed to the initial application setup and developed reusable UI components using **React Native** and **TypeScript**, ensuring consistent and efficient UI development.

Google - Simsim | April-2022 - February – 2023

A web and mobile app for a social e-commerce platform, with the Front end built using React Native with Redux and react-native-web for cross-platform compatibility.

- Maintained and upgraded the Product Detail Page (PDP) and Video Commerce features.
- Focused on improving site speed metrics and monitoring React Web Vitals.
- Integrated Google Analytics to measure user behavior.
- Managed and upgraded CleverTap for campaigns and notifications.

Digitaiken - Hikinjo | May 2022 – March 2023

- Worked on the application development from scratch, including the initial setup and features like collecting precise user addresses using **Google Maps** and other geolocation APIs.
- Developed the in-app chat feature using **Sendbird** and contributed to several other application features.
- Mentored junior developers, providing support and conducting code reviews to ensure high-quality code.

BuyStars | October 2021 - April 2022

- Collaborated on various modules such as stock buy and sell, portfolio management, and user team profiles.
- Developed a notification system that efficiently sends promotions and important updates to millions of users, utilizing **MoEngage** and **Firebase** for analytics and engagement.

Voyapic | April 2021 – September 2021

- Took responsibility for features like location tracking and offline mode, and developed various new screens.
- Integrated the camera module to enable users to click pictures within the app.

TECHNICAL SKILLS:

- Programming Languages-** JavaScript, Typescript
- Frontend -** React, React Native, Redux toolkit, MST, Zustand, HTML, CSS, SASS, Material UI, Bootstrap, Reactstrap
- Backend -** C# .NET, NodeJS, Azure
- Analytics-** Google Analytics, MoEngage
- Build Management-** GitHub Actions, CI/CD

EDUCATION:

Bachelor of Computer Applications, 2018-2021 | JIMS(IPU), New Delhi
